Inspection Equipment Rentals ~~from~~ from the Brands you Trust

Sometimes it just makes sense to rent...

When capital can't be approved but short term rentals can, you need a partner who gives you the flexibility to rent or buy. Fortunately, Hexagon Metrology has easy options for rentals on popular CMM models like the Brown & Sharpe Global and the Brown & Sharpe ONE. For a simple monthly payment you can get into a new piece of Hexagon Metrology equipment for as long as you need it. Return it any time after 6 months, or exercise the buyout payment option at any time.

At Hexagon Metrology, we're all about solutions, whether it's how to measure your part or how to get that piece of equipment you need. Call or Contact us online for complete details on our rental program*.

Sometimes it doesn't make sense to rent...

If you're just looking to get into a new machine for a fixed monthly payment, a financing contract may make more sense. Our financing partner, National Machine Tool Financial, has money to lend at attractive monthly payments, which are typically considerably lower than a rental contract.

Plus, if you buy or finance, you'll be able to take advantage of the tax deductions and accelerated depreciation offered under the Economic Stimulus Act provisions for Section 179. Rentals don't count under this plan. Use our handy online calculator to see how much you could save.* Or Contact Us Online for financing details.

All our CMMs are
Equipped with *pcodmis* The world's most widely used
dimensional metrology software
